Things of Note

- The **Artifact Trove** can be purchased from the Desert Trader for 5 Omni Geodes, is dropped by haunted skulls after the Vault Bundle is complete, is found in tier 3 supply crates, or is dug up in artifact spots on Ginger Island. It has a 3.6% chance of containing an artifact, Golden Pumpkin, Pearl, Treasure Chest, or Treasure Appraisal Guide.
- The **Treasure Appraisal Guide** grants power that triples the sell price of all artifacts.
- Items found in Fishing Chests or by tilling soil in the mines may not mark as found in the Collections tab – this may be corrected by dragging the artifact outside the inventory window and taking it back.

Things of Note

- Weapon enchantments are noted above in **Purple**.
- Swords are well rounded, with quick attacks & low swing delay. Secondary attack blocks.
- Daggers have a short range and are directional (only target area in front of player). Secondary attack causes player to quickly stab multiple times.
- Clubs are slower than swords and daggers but have a wide swing. Secondary attack slams the ground in front of the player, causing area-of-effect damage.
- Slingshot damage depends mainly on weapons used. With the best ammunition (Iridium Cores), a slingshot can deal between 25 and 101 damage and a master slingshot can deal between 50 and 202 damage.
